Fonts - Installation

To get this theme as in the demo, you need to add manually some non-standard fonts.

Let's install them

Download this font from: <http://www.fontspring.com/fonts/e-phemera/satisfaction>

In this font package you will find **PSD-font/satisfaction.ttf** font, which you need in PSD files if you want to change logo name. [Here is how to install it.](#)

A) HTML Structure - [top](#)

This theme is a fixed layout with one columns. All of the information within the main content area is nested within a div with an id of "wrapper". The general template structure is the same throughout the template. Here is the general structure.

```

1 <div id="wrapper">
2
3 <!-- BEGIN MENU -->
4 <div id="menu" class="menu-container">
5     <div class="about"><a href="#" title="About me" class="slideDown" data-slider="aboutme">About</a></div>
6     <div class="gallery"><a href="#" title="Gallery" class="slideDown" data-slider="gallery">Gallery</a></div>
7     <div class="services"><a href="#" title="gallery" class="slideDown" data-slider="services">Services</a></div>
8     <div class="find"><a href="#" title="Find me" class="slideDown" data-slider="contactus">Find</a></div>
9     <div class="projects"><a href="#" title="Projects" class="slideDown" data-slider="projects">Projects</a></div>
10    <div class="news"><a href="#" title="News" class="slideDown" data-slider="news">News</a></div>
11 </div><!-- end div #menu and .menu-container -->
12 <!-- END MENU -->
13
14 <!-- BEGIN SLIDER -->
15 <div id="#some-id" class="slider clearfix hidden">
16     <div class="close">
17         <a href="#" title="Close it" class="slideUp" data-slider="#some-id">Close</a>
18     </div><!-- END div .close (Slider close button) -->
19     <div class="slider-wrapper clearfix"><!-- Slider wrapper -->
20         - SOME CONTENT GOES HERE -
21     </div><!-- div .slider-wrapper (Slider wrapper) -->
22 </div><!-- end div #gallery -->
23 <!-- END SLIDER -->
24
25 </div><!-- end div #wrapper -->
26

```

Add new section

To add new section, you can use this code down here, just replace **- YOUR NEW CONTENT HERE -** with your content.

To add new slider:

```

1. <div id="mySectionName" class="slider hidden">
2.     <div class="close">
3.         <a href="#" title="Close it" class="slideUp" data-slider="mySectionName">Close</a>
4.     </div>
5.     <div class="slider-wrapper clearfix">
6.         - YOUR NEW CONTENT HERE -
7.     </div><!-- END div .slider-wrapper -->
8. </div>
9. [...]

```

To add new section in menu:

```
18. <!-- BEGIN MENU -->
19. <div id="menu" class="menu-container">
20.   <div class="about"><a href="#" title="About me" class="slideDown" data-slider="aboutme">About</a></div>
21.   <div class="mySectionName"><a href="#" title="mySectionName" class="slideDown" data-slider="mySectionName">mySectionN
ame</a></div>
22.   [...]
```

The fields in gray must be with the same name!

If you would like to edit the color, font, or style of any elements in one of these columns, you would do the following:

```
1. .slider a {
2.     color: #someColor;
3. }
```

If you find that your new style is not overriding, it is most likely because of a specificity problem. Scroll down in your CSS file and make sure that there isn't a similar style that has more weight.

I.E.

```
1. #wrapper .slider a {
2.     color: #someColor;
3. }
```

So, to ensure that your new styles are applied, make sure that they carry enough "weight" and that there isn't a style lower in the CSS file that is being applied after yours.

B) CSS Files and Structure - top

Heads up! The HTML template includes a few CSS files, which are described here.

Stylesheets

Here's a list of the stylesheet files I'm using with this template, you can find more information opening each file, All CSS files, they can be found in the (**theme_root/css/**) folder.

File Name	Description
style.css	The theme's main stylesheet and determines the majority of the theme's styling.
jquery.fancybox.css	This stylesheet file is used from jquery.fancybox.pack.js Plugin, to set the styles of "lightbox".

```
1. /* === Reset & Clearfix === */
2.
3. html, body
4. {
5.     height: 100%;
6.     margin: 0;
7.     padding: 0;
8. }
9.
10. body
11. {
```

```

12.     background: url("../img/texture.jpg") repeat;
13.     box-shadow: inset 10px 10px 100px rgba(0, 0, 0, .4);
14.     font-family: "Open Sans", Arial, sans-serif;
15.     /*font-family: 'Overlock', cursive;*/
16.     font-size: 14px;
17.     line-height: 22px;
18. }
19.
20.
21. img
22. {
23.     max-width: 100%;
24.     height: auto;
25.     vertical-align: middle;
26.     border: none;
27.     -ms-interpolation-mode: bicubic;
28. }
29.
30. .separator
31. {
32.     clear: both;
33.     position: relative;
34.     width: 100%;
35.     height: 1px;
36.     background-color: rgba(208, 3, 3, 0.7);
37. }
38.
39. /* === Clearfix === */
40.
41. .clearfix:after{clear:both;content:".";display:block;font-size:0;height:0;line-height:0;visibility:hidden}
42. .clearfix{zoom:1}
43.
44. /* === General styles === */
45.

```

If you would like to edit a specific section of the site, simply find the appropriate label in the CSS file, and then scroll down until you find the appropriate style that needs to be edited.

C) JavaScript - top

This template imports three Javascript files.

Tag	Description
<code>jquery-lates.min.js</code>	jQuery is a Javascript library that greatly reduces the amount of code that you must write.
<code>main.js</code>	Most of the animation in this site is carried out from the customs scripts. There are a few functions worth looking over.
<code>jquery.mixitup.min.js</code>	MixItUp is a light-weight but powerful jQuery plugin that provides beautiful animated filtering and sorting of categorized and ordered content. More information can be found at http://mixitup.io/#WhatIsIt
<code>jquery.jcarousel.min.js</code>	jCarousel is a jQuery plugin for controlling a list of items in horizontal or vertical order. The items, which can be static HTML content or loaded with (or without) AJAX, can be scrolled back and forth (with or without animation). More information can be found at http://sorgalla.com/projects/jcarousel/
<code>jquery.fancybox.pack.js</code>	Fancybox is a tool for displaying images, html content and multi-media in a Mac-style "lightbox" that floats overtop of web page. More information can be found at http://fancybox.net/home

Set your address in Google Map

To set your address in Contact form, in Google Map open

theme_root/js/main.js and change the following code with your address:

```
43.  /* Initialize Google Maps in Contact form */
44.  function initialize() {
45.
46.      var address = 'Sundgauallee, Freiburg im Breisgau, DE';
47.      var geocoder = new google.maps.Geocoder();
48.
49.      var settings = {
50.  [...]
51.
```

Customize Slider - Up speed

If you want to change the slider's speed Up transition, open up the file **theme_root/js/main.js** and change the following code:

```
4.  /* SlideUp div .slider - with #id set in data-slider */
5.  $(''.slideUp').live('click', function(){
6.      var slider = $(this).data('slider');
7.      var height = $("#"+slider).height();
8.      $("#"+slider).animate({'top':-height+'px'}, 1500, function(){ $(this).hide();
9.  });
10. });
11. [...]
12.
```

Customize Slider - Down speed

If you want to change the slider's speed Down transition, open up the file **theme_root/js/main.js** and change the following code:

```
12.  /* SlideDown div .slider - with #id set in data-slider */
13.  $(''.slideDown').live('click', function(){
14.      var slider = $(this).data('slider');
15.      $("#"+slider).show(0, function() { $(this).css('visibility','visible'); $(this)
16.  }).animate({'top':'0'}, 2000); });
17.      $(''.overlay').show();
18.  });
19.  [...]
```

D) PSD Files - top

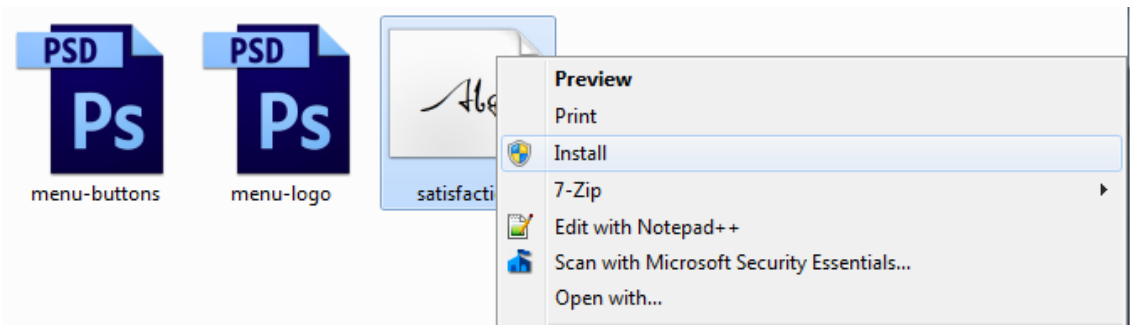

I've included three psds with this theme:

PSD Name	Description
Menu and Logo PSD	This PSD contains the basic design. To change the logo text - you have to open menu-logo.psd and find text layer and simply change the text logo as you like. Save the file as "menuline.png" in "theme_root/img/" folder.
Text Buttons PSD (menu buttons)	This PSD includes all text buttons, which we have used. If you'd like to change the name of some button simply change the text of button as you like. Save the button as a PNG. To change/add button - you have to open menu-buttons.psd and find text layer and simply change the text of some existing button as you like. Save the file as you wish in "theme_root/img/" folder, then see example code down:

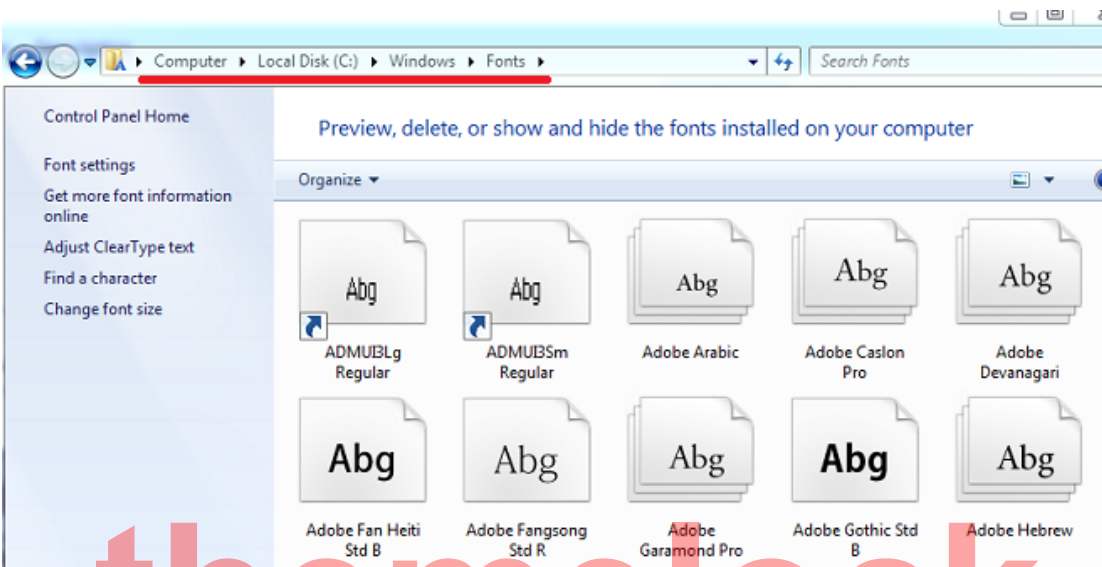

In font package we include font file **satisfaction.ttf** which you have to install before open PSD files

How to install Font

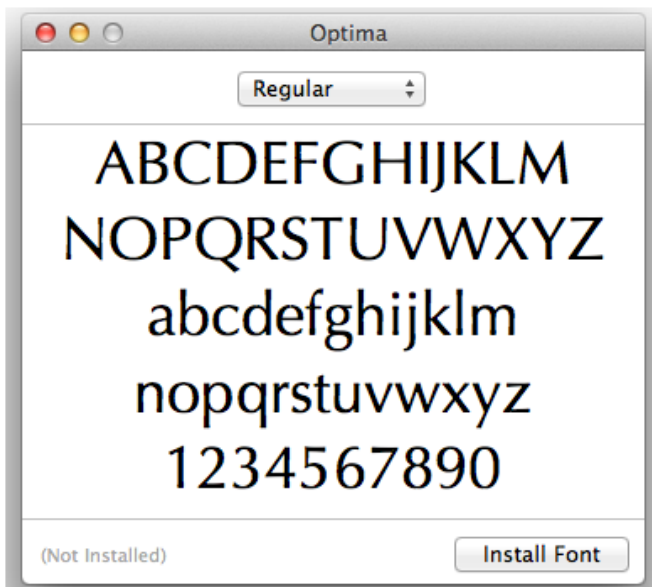

To install font in Windows, click on it with right mouse button and press install:

or go to your **WINDOWS** directory find **Fonts** directory and drag font file in it.

To install on **Mac OS X**. If you want to install the font so that it can be used in documents you create or view, click the **"Install Font"** button that appears below the preview of the font.

Replace button with new one in CSS file

Find these line, for example if you want to replace About button with new one:

```
139. [ ... ]
140. .about
```

```
141. {
142.     position: absolute;
143.     left: 90px;
144.     top: 400px;
145. }
146. .about a { background: url("../img/icon-about.png") no-repeat; }
147. .about a:hover{ background: url("../img/text-about.png") no-repeat; }
148. [...]
149.
```

and change the class name, like follow:

```
139. [...]
140. .newButtonNameM
141. {
142.     position: absolute;
143.     left: 90px;
144.     top: 400px;
145. }
146. .newButtonName a { background: url("../img/icon-newButtonName.png") no-repeat; }
147. .newButtonName a:hover{ background: url("../img/text-newButtonName.png") no-repeat; }
148. [...]
```

E) Sources and Credits - top

I've used the following images, icons or other files as listed.

Name	Description
<div>Menu Buttons</div> <div>Icons</div>	The Pack consists of 6 icons - Gallery, About, News, Services, Find me and Projects. All of them are 165 x 165 pixel and 32-bit PNG format.
<div>Services</div> <div>Icons</div>	The Pack consists of 4 icons, 64 x 64 pixel, all in 32-bit PNG format. More information can be found at http://www.iconfinder.com .
<div>Find me</div> <div>Icons</div>	The Pack consists of 4 icons, 30 x 30 pixel, all in 32-bit PNG format. More information can be found at http://www.iconfinder.com/search?q=iconset%3Asocial-media-stamps1#top
<div>Gallery</div> <div>pictures</div>	Only in demo. Small images: 190 x120 pixel. <ul style="list-style-type: none">http://www.sxc.hu/photo/1149967http://www.sxc.hu/browse.phtml?f=view&id=815331http://www.sxc.hu/browse.phtml?f=view&id=1209894http://www.sxc.hu/photo/1405812http://www.sxc.hu/photo/1386581http://www.sxc.hu/photo/1294766http://www.sxc.hu/photo/1242305http://www.sxc.hu/photo/1185391http://www.sxc.hu/photo/564358http://www.sxc.hu/photo/509364

F) PHP - top

Template include one PHP file :

Tag	Description
contact_form.php	This PHP file send EMAIL on your email address if your client want to contact you. File path is theme_root/contact_form.php

Set your E-mail address

To send this PHP file EMAIL to YOUR mailbox you have to change following line:

```

1.  <?php
2.  $to = 'your-email-here@mail.com'; /* Write YOUR email address here */
3.
4.  $name = strip_tags(trim($_POST['name'])); //sender's name
5.  $email = strip_tags(trim($_POST['email'])); //sender's email
6.  $website = strip_tags($_POST['website']); //sender's website
7.  $subject = strip_tags($_POST['subject']);
8.  $message = strip_tags($_POST['message']);
9.
10.  [...]
11.

```

G) Any additional unique features that need an overview - top

- Projects filters:

Here are filters buttons, all filters are set in **data-filter**

```

118.  <!-- BEGIN LIST OF FILTERS -->
119.  <ul id="projects-filters">
120.    <li class="filter active" data-filter="all">All</li>
121.    <li class="filter" data-filter="photo">Photos</li>
122.    <li class="filter" data-filter="photoshop">Photoshop</li>
123.    <li class="filter" data-filter="illustrator">Illustrator</li>
124.    <li class="filter" data-filter="presentations">Presentations</li>
125.  </ul><!-- END #projects-filters -->
126.  <!-- END LIST OF FILTERS -->
127.  [...]

```

This is some project item. To be filtered you have to put some existing filter in **li .mix** like a class Exmp: **.photo**

```

129. <div id="projects-wrapper" class="setheight clearfix">
130.   <ul class="projects-items" id="filtered-list">
131.     <li class="mix photo">
132.       <a class="item project-full-info" href="projects/project-1.jpg" data-fancybox-group="photo">
133.         <span class="title hide">Lorem ipsum dolor sit amet</span>
134.         <span class="description hide">Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed tempus nibh sed elit
mattis adipiscing. Fusce in hendrerit purus. Suspendisse potenti. Proin quis eros odio, dapibus dictum mauris. Donec nis
i libero, adipiscing id pretium eget, consectetur sit amet leo. Nam at eros quis mi egestas fringilla non nec purus.</sp
an>
135.         
136.       </a>
137.     </li>
138.     <li class="mix illustrator">
139.       <a class="item project-full-info" href="projects/project-2.jpg" data-fancybox-group="illustrator">
140.     [...]
```

All projects may have title, description and preview button. These options can be set in span tags with `.title`, `.description` and `.preview` class.

```

132. <a class="item project-full-info" href="projects/project-1.jpg" data-fancybox-group="photo">
133.   <span class="title hide">- SOME TITLE GOES HERE -</span>
134.   <span class="description hide">- SOME DESCRIPTION GOES HERE -</span>
135.   <span class="preview hide">http://some-preview-link-here.com/</span>
136.   
137. </a>
```

How to Change Social Icons

To add, delete or change social icon you just need to duplicate/remove or change the following code:

```

85. <!-- BEGIN Your social information here -->
86. <div class="social-links clearfix right">
87.   <a class="linkedin" href="http://linkedin.com/" target="_blank" title="Linkedin">
88.     
89.   </a>
90.   <a class="facebook" href="http://www.facebook.com/" target="_blank" title="Facebook">
91.     
92.   </a>
93.   <a class="blog" href="http://name.wordpress.com/" target="_blank" title="Blog">
94.     
95.   </a>
96.   <a class="googlemap" href="#" title="Address">
97.     
98.   </a>
99. </div>
100. [...]
```

Set your Social Information

HIGHLIGHTED IN LIGHT GREY are the properties that you can change for each social type(More advanced users can play with this and change it as they please)

```

85. <!-- BEGIN Your social information here -->
86. <div class="social-links clearfix right">
87.   <a class="linkedin" href="http://linkedin.com/" target="_blank" title="Linkedin">
88.     
89.   </a>
90.   <a class="facebook" href="http://www.facebook.com/" target="_blank" title="Facebook">
91.     
92.   </a>
93.   <a class="blog" href="http://name.wordpress.com/" target="_blank" title="Blog">
```

```
94.         
95.     </a>
96.     <a class="googlemap" href="#" title="Address">
97.         
98.     </a>
99. </div>
100. [...]
101.
```

How to Change Services Icons

To change service icon you just need to change the following code:

```
453. <div class="service-content setheight clearfix">
454.     <div class="service-item">
455.         <h2 class="icon">Graphic Designer</h2>
456.         <p>Fusce porta ipsum tempus lorem volutpat vehicula. Vivamus eros justo, adipisci
ng feugiat aliquam a, congue nec purus. Duis odio felis, accumsan fermentum sed, vulput
ate vitae nibh.</p>
457.     [...]
458.
```

How to Change Gallery Items

To add, delete or change Gallery Items you just need to duplicate/remove or change the following code:

```
537.
538. <!-- BEGIN Gallery section -->
539. <div class="gallery-content setheight clearfix">
540.     <ul class="gallery-items clearfix">
541.         <li>
542.             <div class="gallery-item">
543.                 <div class="photo-pin"></div>
544.                 <a href="gallery/img-1.jpg" alt="Image title" data-fancybox-group="gallery" cl
ass="gallery-slider">
545.                     
546.                 </a>
547.                 <div class="title" Love on the beach</div>
548.             </div>
549.         </li>
550.     [...]
551.
```

How to Change About me Photo and text

All the modules provided here just need simple editing of the text and changing the image were need it. You just have to replace the text and/or the images.

Change photo

```
234. <!-- About - Information about yourself -->
235. <div class="about-content setheight clearfix">
236.     <div class="about-pic left">
237.         
238.     [...]
239.
```

Change text

```
273. <div class="about-text fs16 left">
274.   <h3 class="fs24">About me</h3>
275.   <p>
276.     -PUT YOUR NEW TEXT HERE -
277.   <p>
278.   [...]
279.
```

How to Change About me Skills

To change the skills names, add or remove you have to edit the following tags:

```
239. <!-- BEGIN SKILLS CONTAINER -->
240. <div class="skills-container">
241.   <h3 class="fs16">Coding & Programming</h3>
242.   <ul class="skills-list">
243.     <li>
244.       <h5 class="fs14">HTML5</h5>
245.       <div class="skills-item-level" data-level="80%"></div>
246.       <div class="skill-item-period clearfix">5 years experience</div>
247.     </li>
248.     [...]
249.
```

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
